SUMMARY

Architectural graduate (B.Arch, Ahsanullah University of Science & Technology) with an interest in community-oriented design and the relationship between the built environment and human well-being. Experienced in site analysis, spatial planning, circulation, educational and public-space design, and architectural documentation. Interested in exploring how the design of buildings, open spaces, and community environments can support healthier, more inclusive, and meaningful everyday experiences through interdisciplinary graduate study.

SELECTED ACADEMIC PROJECT

Bachelor's Thesis – Pathway of Sacred Unity and Learning — 7-Acre Educational Campus

- Designed a 7-acre educational campus integrating learning, worship, and public spaces, exploring how spatial organization and connectivity shape movement, interaction, and community experience.
- Explored site-responsive, human-centered strategies through zoning, pedestrian circulation, open-space networks, and connections between buildings and shared community spaces.
- Developed master planning, architectural plans, sections, elevations, and presentation graphics, incorporating sustainable and context-responsive design strategies.

Integrating Urban Amenities with Transit Stops Using Transit-Oriented Development (TOD)

- Explored how transit-oriented development can connect transportation, public amenities, and urban spaces, creating integrated environments that support movement, interaction, and community life.
- Designed pedestrian pathways, plazas, bridges, landscaped areas, and water features to strengthen connections between transit stops and surrounding urban spaces.
- Applied people-centered and context-responsive strategies to transform transit areas into connected public environments that encourage walking, gathering, and everyday social interaction.

A Pet-Friendly Space in Katabon — A Bidirectional Bond

- Explored human–animal interaction in urban space, designing a pet-friendly environment that supports shared activities, social interaction, and everyday community life.
- Developed a connected network of pet areas, shaded spaces, seating, water features, and landscapes to encourage movement, exploration, and interaction between people and animals.
- Applied people-centered and nature-integrated design strategies to create an inclusive public environment supporting well-being, learning, accessibility, and community connection.

Reviving Benarasi Palli at Mirpur, Dhaka — Economic Regeneration of Benarasi Palli

- Explored community-centered neighborhood regeneration by reorganizing a dense settlement into a healthier, more connected environment while preserving its existing community and traditional weaving culture.
- Integrated living, working, and community functions through residences, weaving workshops, training spaces, markets, schools, mosques, and shared gathering spaces, strengthening connections between everyday life and local economic activity.
- Applied pedestrian-oriented and context-responsive strategies through connected streets, communal nodes, green buffers, improved ventilation, lighting, drainage, and open spaces to support movement, interaction, and neighborhood well-being.

EDUCATION

July 2026 Bachelor of Architecture (B.Arch)

Ahsanullah University of Science & Technology (AUST), Dhaka, Bangladesh

PROFESSIONAL EXPERIENCE

Teacher, Primrose School of Athens, Athens, Georgia, USA

Sept 2026 – Present

- Delivered customer service and processed transactions as a Merchandise Associate/Cashier in fast-paced retail environments.
- Maintained merchandise presentation, replenished inventory, and supported daily store operations.

Designer Intern, The Structural Engineers Ltd., Bangladesh

March 2024 – June 2024

- Produced detailed 2D structural drawings and construction documentation in AutoCAD for projects ranging from single-unit apartments to 15-story buildings, including beam and column layouts, foundation plans, and reinforcement details.
- Revised drawings against engineering comments and evolving project requirements, maintaining accuracy of dimensions, annotations, and layer standards.
- Coordinated with structural engineers to finalize drawings for construction and client submission.

CERTIFICATIONS

- Harvard University (edX) – The Architectural Imagination – September 2024
- MIT (edX) – Sustainable Building Design – June 2025

SKILLS

Design Software AutoCAD, SketchUp

Productivity Tools Microsoft Word, Microsoft PowerPoint

Core Skills	Architectural Drafting, Construction Documentation, Concept Development, Space Planning, Site Planning, Presentation Graphics, Team Collaboration
-------------	---

LANGUAGES

English | Bangla

WORK AUTHORIZATION

Authorized to work in the United States (Lawful Permanent Resident).
